

2ND **MASS**  
**STABILISATION**  
CONFERENCE | **2015**  
APRIL 22<sup>ND</sup> – 24<sup>TH</sup> 2015  
SIBELIUS HALL, LAHTI, FINLAND

## GENERAL INFORMATION

The conference will be held at the Congress & Concert centre Sibelius Hall, Lahti, Finland.

Participation fee:

- 280 € / person (Jan 1st – March 31st, 2015)
- 320 € / person (April 1st, 2015 and after)

Fee includes program with Get Together event, Dinner and Excursions.

Cancellation policy, see [www.massstabilisation.fi](http://www.massstabilisation.fi)

Registration: by 1st April 2015

Hotels, travelling to Lahti: [www.massstabilisation.fi](http://www.massstabilisation.fi)

Register soon, the amount of participants is limited.

Registration and more information

# 2ND MASS STABILISATION CONFERENCE 2015

APRIL 22<sup>ND</sup> – 24<sup>TH</sup> 2015  
SIBELIUS HALL, LAHTI, FINLAND

## INTERNATIONAL MASS STABILISATION CONFERENCE 2015

# MASS STABILISATION IS CONQUERING THE WORLD

Mass stabilisation is a ground improvement method for soft or contaminated soils, which by adding binders makes the areas with low quality soils technically and environmentally fit for construction. Mass stabilisation allows for carrying out infrastructure projects in wet areas and in the areas with soft soils at reasonable costs without expensive piling or huge mass replacements. The soft soils include clay, sludge, peat, silt or sediments.

In the past 10 years, the mass stabilisation technology and its applications have been under intense development by the leading experts, such as Allu, Ramboll, Lemminkäinen Infra, Rusol, Nordkalk, Finnsementti and Keller. The mass stabilisation method is spreading rapidly to every part of the world.

The mass stabilisation developer companies together with Lahti Region Development LADEC invite interested companies, public authorities, customers and innovative industry leaders to join The 2nd Mass Stabilisation Conference to be held in Lahti, Sibelius Hall, Finland.

The first Mass Stabilisation Conference held in 2008, brought together 250 people world wide!

## THE MASS STABILISATION METHOD IS:

- Superior in Terms of Economics, Technique and Environment
- Supporting Sustainable Development - Diminishing the Use of Natural Aggregates; Less CO<sub>2</sub> -emissions
- Supporting Recycling of Natural and Industrial Surplus Materials
- Saving Energy and Natural Resources,
- Enabling to Utilise Dredged Sludge, Contaminated Soils and Soft Soils
- Transforming Low Quality Soil Areas into Fit for Construction in a Cost-Effective Way

## PROGRAMME

### Wednesday, April 22nd 2015

17.00 - 20.00 Get Together, Sibelius Hall, Lahti  
Sponsors presentations, cocktails  
Registration

### Thursday, April 23rd 2015

09.00 - 10.00 Registration and coffee  
10.00 - 10.10 Opening of the Conference,  
Major of Lahti City Mr. Jyrki Myllyvirta  
10.10 - 10.40 Opportunities of Mass Stabilization  
10.40 - 11.10 Mid depth mixing in Japan  
11.10 - 11.30 Break, Exhibition  
11.30 - 11.50 Mass Stabilisation experiences from  
around the globe  
11.50 - 12.20 Soil mixing and dry mixing in the United States  
12.20 - 13.30 Lunch, Exhibition  
13.30 - 13.50 Mass Stabilisation in infrastructure and  
environmental construction  
13.50 - 14.10 Mass Stabilisation machinery  
14.10 - 14.30 Implementing Mass Stabilisation and  
quality assurance  
14.30 - 14.50 Coffee, Exhibition  
14.50 - 15.10 Remediating contaminated soils in Mexico  
15.10 - 16.30 Executed cases around the world  
16.30 - 16.50 Final discussions and closing the meeting  
19.00 Dinner

Speakers introductions in [www.massstabilisation.fi](http://www.massstabilisation.fi)

### Friday, April 24th 2015, Excursions

Excursions (8.00 - 14.00)

09.00 Allu Factory visit  
11.00 Job site presentation  
14.00 Transfer to Lahti (via Helsinki-Vantaa Airport,  
where bus will stop around 15.00)

Organisers reserve the right to programme changes.
